X BELLO

## A secure communication application that allows
real-time information exchange and workforce management
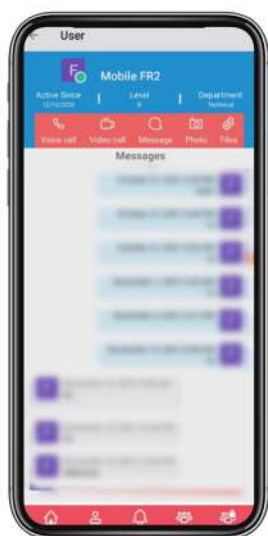

- **XBELLO** is a self-owned, self-contained and self-operated system. It is also a "communication, command and control" app. It deploys in seconds on the smartphones, tablets, desktops and laptops you are using right now. It provides a secure, powerful, easy-to-use collaboration platform to collect and share information and coordinate personnel.

- **XBELLO** is an **instant messaging** system for registered **closed** users & groups. It supports secure exchange of text messages, voice calls, videocalls, group calls, and transfer of multimedia files, through data networks.

- **XBELLO** provides the location, identity, and operational status of your entire team facilitating enhanced decision making and a more effective response.

- **XBELLO** gives you the opportunity to operate a "tactical communication bubble".
